

Git Workflow Guide

Department: Training

Branching Strategy

The company follows a trunk-based development model. Feature branches should be short-lived, merged within 2-3 days via pull request.

Commit Messages

Commit messages should follow the conventional commits format, e.g. 'feat: add login endpoint' or 'fix: correct timezone bug'.

Code Review

Every pull request requires at least one approval before merging. Reviewers are expected to respond within 1 business day.
